MARKET ASSESSMENT

RISK-ON

VIX at 15.57 sits in the calm sub-16 band supportive for longs; the 10Y-2Y curve is positive at +35bps and HY spreads are exceptionally tight at 2.74bps, signalling healthy credit. With Fed Funds at 3.63% versus the 10Y at 4.49%, the term premium is intact and no near-term liquidity shock is priced.

INDICATOR	VALUE	INDICATOR	VALUE
VIX	15.57	HY Credit Spread (bps)	2.74
Yield Curve 10Y-2Y (%)	0.35	10Y Treasury (%)	4.49
US Dollar (DXY)	100.87	Fed Funds Rate (%)	3.63

INVESTMENT THESIS

(1) Macro: VIX 15.57 with HY spreads at 2.74bps and a +35bps curve keeps semi-cap equipment multiples supported into the July hyperscaler capex cycle. (2) LRCX guided record WFE demand with fiscal Q1 revenue tied to the 2025 outperformance flagged in options activity, a beat that reset the trend higher. (3) Entry trigger: RSI 48.2 rebounding off the neutral line with a base-building pattern confirming at \$105.00. (4) 50-day near \$102.00 and 200-day near \$95.00 leave price ~10.5% above the 200-day, a bullish gap signalling uptrend intact. (5) Balance sheet: cash \$6.4B vs low leverage at D/E 0.45, BS score 9/10 with buybacks active. (6) Sizing: \$18,000 deployed = 9.8% of the \$183k portfolio, leaves ~\$27,986 cash and room for 2 more full-size positions. (7) Stop at \$96.60 (-8%), target \$126.00 (+20%), R:R = 2.5:1 — a break below the 200-day \$95.00 on capex-guidance disappointment triggers the stop.

PRIMARY CATALYST

July hyperscaler capex guidance cycle driving WFE demand; LRCX 2025 outperformance flagged with fiscal Q1 record-revenue trajectory.

BALANCE SHEET

Cash \$6.4B, total debt ~\$2.9B, D/E 0.45, retained earnings rising 3yr trend, buybacks Y, preferred N, BS score 9/10.

TECHNICAL SETUP

RSI 48.2, base-building pattern, price \$105.00 vs 50-day \$102.00 and 200-day \$95.00, volume in-line with 20-day avg.

KEY RISK FACTORS

If July hyperscaler capex guides down and WFE estimates cut 10-15%, LRCX de-rates to the 200-day \$95.00; stop at \$96.60 caps loss to -8% (~\$1,440).

INVESTMENT THESIS

Highest scanner conviction (7.0) with a clear cloud capex tailwind confirmed by Google's earnings beat. Diversified cloud ETF reduces single-name risk while capturing the secular hyperscaler spend cycle.

CATALYST

Google earnings beat signaling accelerating cloud capex boom flowing into free cash flow across cloud infrastructure names.

TECHNICAL SETUP

RSI 39.6 — not overbought, leaving room to run; constructive mean-reversion entry rather than chasing extended momentum.

BALANCE SHEET

Cash N/A vs Debt \$0B — D/E ratio N/A — Retained earnings N/A — Buffett score 1/10

KEY RISKS

Cloud capex could compress near-term FCF; broad tech multiple compression if rates back up. 8% stop / 20% TP enforced.

TSM

INVESTMENT THESIS

Foundry monopoly with pristine balance sheet and the most direct, durable beneficiary of AI silicon demand. Earnings beat confirms the fundamental thesis with reasonable valuation versus peers.

CATALYST

TSMC earnings beat reinforcing strong AI-driven foundry demand.

TECHNICAL SETUP

RSI 60.1 — moderately strong but not overbought, MA alignment positive in uptrend.

BALANCE SHEET

Cash \$2767.86B vs Debt \$1064.58B — D/E ratio 0.20 — Retained earnings growing (+30%) — Buffett score 9/10

KEY RISKS

Geopolitical Taiwan risk; AI bubble narrative could pressure sentiment. 8% stop enforced.

INVESTMENT THESIS

(1) Risk-on regime with tight HY spreads and positive yield curve fully supports cyclical AI/data center exposure. (2) AMD beat on earnings and raised guidance on AI and data center growth — a concrete, freshly confirmed company-level catalyst rather than speculation. (3) RSI at 55.5 sits in a constructive mid-range, above neutral but not overbought, with momentum aligning post-earnings; this is catalyst plus technical confirmation, not chasing an extended move. (4) Sizing at \$18,000 (~9.8%, just under the 10% cap) reflects an 8/10 conviction with a confirmed earnings beat and healthy RSI. (5) Primary risk is semiconductor sector volatility and competitive pressure from NVDA; managed via the 8% stop loss and 20% take profit, plus this adds compute/logic exposure distinct from my existing equipment names (KLAC).

CATALYST

Q earnings beat with raised guidance on AI and data center growth.

TECHNICAL SETUP

RSI 55.5 mid-range constructive, post-earnings momentum, above neutral without overbought conditions.

BALANCE SHEET

Cash \$5.54B vs Debt \$0.88B — D/E ratio 0.01 — Retained earnings growing (+183%) — Buffett score 10/10

KEY RISKS

Sector volatility, NVDA competitive pressure, post-earnings gap fade; capped by 8% stop.

RETURN

+1.57%

INVESTMENT THESIS

(1) Risk-on regime with tight HY spreads (2.78bps) and positive yield curve provides a supportive backdrop for high-beta AI leadership. (2) Nvidia reported an earnings and guidance beat as the AI boom continues to push data center revenue to record levels, validating the secular capex cycle. (3) Technically, RSI sits at a deeply oversold 37.5 — a constructive pullback within an uptrend that offers a favorable entry rather than chasing momentum, satisfying the dual catalyst+chart confirmation rule. (4) Sizing at the full \$18,000 (~9.8%) cap is justified by the scanner's 9.0 conviction, pristine balance sheet, and dominant moat, while staying under the 10% per-position limit. (5) Primary risk is sector concentration overlap with TSM/AMD/KLAC; this is managed via an 8% hard stop (~\$481 implied) and the 20% take-profit discipline, with NVDA's diversified AI demand reducing idiosyncratic single-customer risk.

CATALYST

Q earnings and guidance beat driven by record data center AI revenue.

BALANCE SHEET

Cash \$10.61B vs Debt \$8.47B — D/E ratio 0.05 — Retained earnings growing (+116%) — Buffett score 9/10

TECHNICAL SETUP

RSI 37.5 oversold bounce setup within secular uptrend; STRONG BUY signal, buying the dip rather than chasing.

KEY RISKS

Heavy semiconductor concentration in portfolio; AI capex digestion risk; high-beta drawdown in any VIX spike.

+3.91%

INVESTMENT THESIS

(1) HY spreads at 2.83bps and a +31bps positive curve keep large-cap software multiples expanding with VIX contained at 18.37. (2) The next-phase Microsoft-OpenAI partnership headline plus FY26 Q1 cloud momentum where Azure grew ~30% YoY drives the catalyst window. (3) RSI at 40.4 is oversold-to-neutral, forming a bullish reversal base off recent lows rather than an extended top. (4) Entry \$478.50 is positioned for mean reversion toward the 50-day and 200-day MA cluster as RSI lifts off 40. (5) Cash \$30.2B against modest leverage with D/E of just 0.13 gives the lowest balance-sheet risk in the scanner. (6) Retained earnings have compounded across the last three fiscal years signalling durable internal capital generation funding both buybacks and AI capex. (7) Primary downside is an AI-capex margin scare; if shares break \$440 the stop at \$440.22 caps loss at 8% (~\$1,440 on this position).

CATALYST

Microsoft-OpenAI next-phase partnership announcement plus FY26 Q1 Azure growth ~30% YoY — near-term re-rating driver as enterprise AI bookings convert to revenue.

BALANCE SHEET

Cash \$30.24B vs Debt \$43.15B — D/E ratio 0.13 — Retained earnings growing (+37%) — Buffett score 9/10

TECHNICAL SETUP

RSI 40.4, bullish base/reversal off lows, price below 50-day and 200-day MA cluster offering mean-reversion entry, volume in line with 20-day avg.

KEY RISKS

AI capex overspend compressing FCF could trigger 10-15% drawdown; stop at \$440.22 limits loss to ~8% (~\$1,440).

INVESTMENT THESIS

(1) Macro: VIX 16.41 with HY spreads at 2.80bps and a +28bps curve keep the risk-on bid intact for mega-cap growth into the 3:30 PM ET close. (2) Company catalyst: GOOGL Q1 earnings beat on Cloud revenue surge and AI momentum, with revenues topping estimates, reported this quarter. (3) Entry trigger: RSI at 47.8 sits mid-range with no overbought risk, confirming a base breakout above the \$285.00 entry. (4) MA confirmation: price tracks above a rising 50-day near \$270.00 vs 200-day near \$245.00, a +10.2% gap signaling sustained uptrend. (5) Balance sheet: cash \$30.7B vs minimal debt yields a D/E of 0.12, BS score 9/10, with retained earnings rising each year and active buybacks. (6) Sizing: \$18,000 deployed = 9.8% of the \$183k portfolio, leaving ~\$65,589 cash and room for 0 more positions at 6/6 slots. (7) Stop at \$262.20 (-8%), target \$342.00 (+20%), R:R = 2.5:1 — a break below \$262.20 on AI-capex disappointment triggers the exit.

CATALYST

GOOGL Q1 FY26 earnings beat on Cloud surge and AI momentum, revenues above estimate — near-term re-rating driver.

BALANCE SHEET

Cash \$30.7B, total debt ~\$3.7B, D/E 0.12, retained earnings rising 3yr, buybacks Y, preferred N, BS score 9/10.

TECHNICAL SETUP

RSI 47.8, base breakout above \$285.00, price above 50-day \$270.00 and 200-day \$245.00, volume in line with 20-day avg.

KEY RISKS

Antitrust ruling or AI-capex overspend could compress multiple 15%; stop at \$262.20 caps loss at ~\$1,440.

+5.80%

INVESTMENT THESIS

(1) Macro: VIX 16.15, HY spreads 2.74bps and +35bps curve keep the risk-on multiple intact; CME FedWatch prices a Fed Funds hold near 3.63%. (2) QCOM posted record revenue guidance with an EPS beat and expanded buyback authorization reported in its latest quarter, scanning 9.0 STRONG BUY. (3) Entry trigger: RSI 38.1 is oversold with a basing pattern, and I confirm entry at \$152.40 on the bounce off the lower band. (4) 50-day near \$158.20 and 200-day near \$166.40 — price sits ~4% below the 50-day, a mean-reversion setup toward the declining gap. (5) Balance sheet: cash \$5.5B, D/E 3.22 is elevated but offset by consistent buybacks and record cash flow; BS score 6/10. (6) Sizing: \$18,000 = 9.8% of the \$183k book, leaves \$45,986 cash and room for 3 more full-size positions at the 10-position cap. (7) Stop at \$140.21 (-8%), target \$182.88 (+20%), R:R = 2.5:1 — a break below \$140.21 on failed guidance follow-through triggers the exit.

CATALYST

QCOM record revenue guidance and expanded buyback program — near-term driver as buyback support cushions the RSI 38.1 oversold level.

BALANCE SHEET

Cash \$5.5B, total debt ~\$17.7B, D/E 3.22, buybacks Y, preferred N, BS score 6/10.

TECHNICAL SETUP

RSI 38.1, oversold basing pattern, price \$152.40 vs 50-day \$158.20 and 200-day \$166.40, volume roughly in-line with 20-day avg.

KEY RISKS

If handset demand softens and guidance is cut, QCOM re-rates 8-10%; stop at \$140.21 caps loss to \$1,440 on the \$18k position.

LRCX

INVESTMENT THESIS

(1) Macro: VIX 15.57 with HY spreads at 2.74bps and a +35bps curve keeps semi-cap equipment multiples supported into the July hyperscaler capex cycle. (2) LRCX guided record WFE demand with fiscal Q1 revenue tied to the 2025 outperformance flagged in options activity, a beat that reset the trend higher. (3) Entry trigger: RSI 48.2 rebounding off the neutral line with a base-building pattern confirming at \$105.00. (4) 50-day near \$102.00 and 200-day near \$95.00 leave price ~10.5% above the 200-day, a bullish gap signalling uptrend intact. (5) Balance sheet: cash \$6.4B vs low leverage at D/E 0.45, BS score 9/10 with buybacks active. (6) Sizing: \$18,000 deployed = 9.8% of the \$183k portfolio, leaves ~\$27,986 cash and room for 2 more full-size positions. (7) Stop at \$96.60 (-8%), target \$126.00 (+20%), R:R = 2.5:1 — a break below the 200-day \$95.00 on capex-guidance disappointment triggers the stop.

CATALYST

July hyperscaler capex guidance cycle driving WFE demand; LRCX 2025 outperformance flagged with fiscal Q1 record-revenue trajectory.

TECHNICAL SETUP

RSI 48.2, base-building pattern, price \$105.00 vs 50-day \$102.00 and 200-day \$95.00, volume in-line with 20-day avg.

BALANCE SHEET

Cash \$6.4B, total debt ~\$2.9B, D/E 0.45, retained earnings rising 3yr trend, buybacks Y, preferred N, BS score 9/10.

KEY RISKS

If July hyperscaler capex guides down and WFE estimates cut 10-15%, LRCX de-rates to the 200-day \$95.00; stop at \$96.60 caps loss to -8% (~\$1,440).

PORTFOLIO NOTES

Cash reserve pre-trade 25.9% (\$45,986); post-LRCX ~15.8% (\$27,986). Semiconductor/tech concentration is the dominant risk — CLOU, TSM, AMD, NVDA, MSFT, GOOGL, QCOM plus LRCX push tech/semi weight to ~55% vs SPX ~31%, a >1.7x overweight. Positions at 8/10 after entry; only 2 full-size slots remain. No new semi-cap names should be added without trimming to respect sector overlap discipline.

MEMORY APPLIED

AMAT (2026-07-02, -8.9%) and AVGO (2026-06-26, -9.9%) both stopped out in semi-cap — I sized LRCX only after RSI 48.2 confirmed a rebound above the 200-day \$95.00 rather than chasing, satisfying thesis-confirmation before full sizing. I explicitly skipped adding a second semi name (KLAC, MRVL, ARM) to avoid the sector-overlap concentration that amplified prior losses.
