PORTFOLIO NOTES

Cash reserve \$61,602 = 35.8% of \$172,126 total. Positions at 6/6 cap — no new entries possible without an exit. Sector concentration is heavily semiconductor/tech: TSM, KLAC, AMD, NVDA all chip-related plus CLOU/MSFT cloud — roughly 60%+ tech vs SPX ~30%, well above the 2x flag. KLAC up +15.0% near its TP of \$282.54 (now \$270.71) — monitor for take-profit trim. Risk posture: fully invested in slots, holding cash given concentration and overbought semicap RSI readings.
