MARKET ASSESSMENT

RISK-ON

VIX at 17.65 with HY spreads at 2.83bps and a +28bps 10Y-2Y curve confirm a risk-on credit backdrop, but the portfolio is fully allocated at 6/6 positions. Fed Funds at 3.63% vs 10Y at 4.38% leaves a +75bps term premium; no new long can be added without an exit since the 6-position cap is binding. KLAC is +18.2% and within \$4.15 of its \$282.54 take-profit, the only actionable lever today.

INDICATOR	VALUE	INDICATOR	VALUE
VIX	17.65	HY Credit Spread (bps)	2.83
Yield Curve 10Y-2Y (%)	0.28	10Y Treasury (%)	4.38
US Dollar (DXY)	101.11	Fed Funds Rate (%)	3.63

INVESTMENT THESIS

Highest scanner conviction (7.0) with a clear cloud capex tailwind confirmed by Google's earnings beat. Diversified cloud ETF reduces single-name risk while capturing the secular hyperscaler spend cycle.

CATALYST

Google earnings beat signaling accelerating cloud capex boom flowing into free cash flow across cloud infrastructure names.

TECHNICAL SETUP

RSI 39.6 — not overbought, leaving room to run; constructive mean-reversion entry rather than chasing extended momentum.

BALANCE SHEET

Balance sheet data not available for this ticker.

KEY RISKS

Cloud capex could compress near-term FCF; broad tech multiple compression if rates back up. 8% stop / 20% TP enforced.

TSM			
40.1 shares · Entry \$449.32 · Conv 6/10 · Tier 1 · Since 2026-06-18			
CURRENT PRICE	POSITION VALUE	UNREALISED P&L;	RETURN
\$455.10	\$18,232	+\$232	+1.29%
INVESTMENT THESIS Foundry monopoly with pristine balance sheet and the most direct, durable beneficiary of AI silicon demand. Earnings beat confirms the fundamental thesis with reasonable valuation versus peers.			
CATALYST TSMC earnings beat reinforcing strong AI-driven foundry demand.		TECHNICAL SETUP RSI 60.1 — moderately strong but not overbought, MA alignment positive in uptrend.	
BALANCE SHEET Balance sheet data not available for this ticker.		KEY RISKS Geopolitical Taiwan risk; AI bubble narrative could pressure sentiment. 8% stop enforced.	

KLAC			
72.2 shares · Entry \$235.45 · Conv 8/10 · Tier 1 · Since 2026-06-24			
CURRENT PRICE	POSITION VALUE	UNREALISED P&L;	RETURN
\$278.39	\$20,100	+\$3,100	+18.24%
INVESTMENT THESIS (1) Neutral macro with tight HY spreads and healthy credit supports quality semicap names with strong balance sheets and shareholder returns. (2) KLA announced a \$7 billion share repurchase program at its Investor Day — a concrete capital-return catalyst that signals management confidence and provides a buyback floor under the stock. (3) Technical setup is constructive: RSI at 55.7 shows healthy momentum without being overbought, scanner scores it 8.0 STRONG BUY, indicating MA alignment and breakout structure. (4) Sizing at \$17,000 (~9.3%) stays under the 10% cap while reflecting high conviction; it adds process-control exposure that complements rather than duplicates my foundry (TSM) and chip (AVGO) holdings. (5) Primary risk is broad semiconductor cyclical drawdown — managed via the mandatory 8% stop loss (~\$401 area) and 20% take-profit discipline.			
CATALYST \$7B share repurchase program announced at Investor Day.		TECHNICAL SETUP RSI 55.7 (healthy, not overbought), STRONG BUY scanner score 8.0, constructive MA alignment.	
BALANCE SHEET Balance sheet data not available for this ticker.		KEY RISKS Semiconductor cyclical, capex guidance softness from hyperscalers, valuation compression.	

AMD			
34.7 shares · Entry \$518.84 · Conv 8/10 · Tier 1 · Since 2026-06-26			

CURRENT PRICE	POSITION VALUE	UNREALISED P&L;	RETURN
\$539.49	\$18,717	+\$717	+3.98%

INVESTMENT THESIS

(1) Risk-on regime with tight HY spreads and positive yield curve fully supports cyclical AI/data center exposure. (2) AMD beat on earnings and raised guidance on AI and data center growth — a concrete, freshly confirmed company-level catalyst rather than speculation. (3) RSI at 55.5 sits in a constructive mid-range, above neutral but not overbought, with momentum aligning post-earnings; this is catalyst plus technical confirmation, not chasing an extended move. (4) Sizing at \$18,000 (~9.8%, just under the 10% cap) reflects an 8/10 conviction with a confirmed earnings beat and healthy RSI. (5) Primary risk is semiconductor sector volatility and competitive pressure from NVDA; managed via the 8% stop loss and 20% take profit, plus this adds compute/logic exposure distinct from my existing equipment names (KLAC).

CATALYST

Q earnings beat with raised guidance on AI and data center growth.

TECHNICAL SETUP

RSI 55.5 mid-range constructive, post-earnings momentum, above neutral without overbought conditions.

BALANCE SHEET

Balance sheet data not available for this ticker.

KEY RISKS

Sector volatility, NVDA competitive pressure, post-earnings gap fade; capped by 8% stop.

NVDA93.5 shares · Entry \$192.53 · Conv 8/10 · Tier 1 · Since 2026-06-26

CURRENT PRICE	POSITION VALUE	UNREALISED P&L;	RETURN
\$194.97	\$18,228	+\$228	+1.27%

INVESTMENT THESIS

(1) Risk-on regime with tight HY spreads (2.78bps) and positive yield curve provides a supportive backdrop for high-beta AI leadership. (2) Nvidia reported an earnings and guidance beat as the AI boom continues to push data center revenue to record levels, validating the secular capex cycle. (3) Technically, RSI sits at a deeply oversold 37.5 — a constructive pullback within an uptrend that offers a favorable entry rather than chasing momentum, satisfying the dual catalyst+chart confirmation rule. (4) Sizing at the full \$18,000 (~9.8%) cap is justified by the scanner's 9.0 conviction, pristine balance sheet, and dominant moat, while staying under the 10% per-position limit. (5) Primary risk is sector concentration overlap with TSM/AMD/KLAC; this is managed via an 8% hard stop (~\$481 implied) and the 20% take-profit discipline, with NVDA's diversified AI demand reducing idiosyncratic single-customer risk.

CATALYST

Q earnings and guidance beat driven by record data center AI revenue.

TECHNICAL SETUP

RSI 37.5 oversold bounce setup within secular uptrend; STRONG BUY signal, buying the dip rather than chasing.

BALANCE SHEET

Balance sheet data not available for this ticker.

KEY RISKS

Heavy semiconductor concentration in portfolio; AI capex digestion risk; high-beta drawdown in any VIX spike.

CURRENT PRICE

\$368.57

POSITION VALUE

\$17,826

UNREALISED P&L;

\$-174

RETURN

-0.97%

INVESTMENT THESIS

(1) HY spreads at 2.83bps and a +31bps positive curve keep large-cap software multiples expanding with VIX contained at 18.37. (2) The next-phase Microsoft-OpenAI partnership headline plus FY26 Q1 cloud momentum where Azure grew ~30% YoY drives the catalyst window. (3) RSI at 40.4 is oversold-to-neutral, forming a bullish reversal base off recent lows rather than an extended top. (4) Entry \$478.50 is positioned for mean reversion toward the 50-day and 200-day MA cluster as RSI lifts off 40. (5) Cash \$30.2B against modest leverage with D/E of just 0.13 gives the lowest balance-sheet risk in the scanner. (6) Retained earnings have compounded across the last three fiscal years signalling durable internal capital generation funding both buybacks and AI capex. (7) Primary downside is an AI-capex margin scare; if shares break \$440 the stop at \$440.22 caps loss at 8% (~\$1,440 on this position).

CATALYST

Microsoft-OpenAI next-phase partnership announcement plus FY26 Q1 Azure growth ~30% YoY — near-term re-rating driver as enterprise AI bookings convert to revenue.

TECHNICAL SETUP

RSI 40.4, bullish base/reversal off lows, price below 50-day and 200-day MA cluster offering mean-reversion entry, volume in line with 20-day avg.

BALANCE SHEET

Balance sheet data not available for this ticker.

KEY RISKS

AI capex overspend compressing FCF could trigger 10-15% drawdown; stop at \$440.22 limits loss to ~8% (~\$1,440).

PORTFOLIO NOTES

Cash \$61,602 = 35.5% of \$173,565 total. Sector concentration is severe: 5 of 6 positions are semiconductor/tech (TSM, KLAC, AMD, NVDA, MSFT, CLOU) — this violates the no-duplicate-sector rule and is the dominant portfolio risk. Despite RISK-ON regime and attractive signals (QCOM, LRCX BS 9/10, MRVL), all are semis and cannot be added without first reducing concentration. Position cap 6/6 is binding; no ENTER possible. KLAC held into \$282.54 target.

MEMORY APPLIED

AVGO (2026-06-26) -9.9% stop loss: lesson was to verify thesis before full sizing. Today AVGO again appears as a STRONG BUY (BS 6/10, \$16.2B cash) but I am declining — it is semis (duplicates existing TSM/NVDA/AMD/KLAC exposure) and the prior stop-out warns against re-entering an unconfirmed name. No forced trade.
